

Dear ,

As part of our initiative "Common Good Business Angels", we are currently looking for startups that integrate human, social, and ethical dimensions at the core of their business model.

We believe that successful innovation and value creation is not only measured by growth or financial returns, but also by its contribution to the common good. To better understand how your startup aligns with these values, we kindly invite you to answer the following short questionnaire.

Your answers will help us assess the depth of your commitment and identify synergies for potential support, visibility, and collaboration within our ecosystem.

Please take the time to answer sincerely.

Pre-screening Questionnaire

1. **Common Good**
How does your innovation help people and communities flourish on a human and social level, contributing to the common good?
2. **Participation**
Participation is a key foundation that encourages stakeholders to get involved. What actions do you take to foster responsibility and engagement from everyone (founders, employees, management, investors, etc.)?
3. **Solidarity**
How do you integrate solidarity within your company, whether in governance or daily practices (e.g. profit-sharing, supporting vulnerable individuals, etc.)?
4. **Subsidiarity**
How does your startup ensure that autonomy and responsibility are upheld for those closest to operations or field needs, while higher levels only intervene in a supportive, not substitutive, role?
5. **Universal Destination of Goods**
What actions do you take to ensure that the goal of your business activity is not solely enrichment, but also the human development of all people?
6. **Human Dignity**
How does your startup place human dignity at the center of its decisions and practices, ensuring that each team member, customer, or partner is treated as a full person, with respect, fairness, and integrity?

Thank you very much for your time and contribution.
We look forward to reading your answers.

Warm regards,

Emeric De Geffrier,

President
